

ROCKY FONG

LONG KEI, FONG

<http://rockyfong.com>

Introduction

I am a **multidisciplinary designer** specialised in service design, user experience and graphic design, with a background of product design. While being expert in converting observation to insightful opportunity by capturing people's needs and deep motivations, I am also capability of visualising abstract conceptual patterns into logical information graphic, ecosystem mapping and motion graphic animation, which is benefited me to come up with contextual solutions creatively and accurately, as well as take advantage to communicate with stakeholders in an engaging way.

Having studied in Macau China, Taiwan and United Kingdom, I have a strong sense of multicultural communication, which equipped me flexible, social and sensitive skills that enhances my working relationship with culture difference. I also have a wide range of interests such as different sports and music, additionally I am a pianist and have learned piano for over 15 years (Royal College of Music Grade 8 Certification, ABRSM).

I am interested in future service and development especially in digital trends and new technologies. I am always excited in getting new challenges and making a tangible execution. I believe that Service Design is an indispensable strategy to make achievable social impact and improve people's life, it will be a key role in a business and startups for every industries in the near future.

Currently I have finished my MA Service Design in Royal college of Art in London UK, and looking for interesting permanent jobs, internship and freelance.
